

Job Description for Software Engineer C#, .NET

Code: RV-PR01/22 (Thessaloniki); RV-PR02/22 (Athens)

Company Profile:

Since April 2004 RoboVision offers high-level industrial automation services. Our business scope entails custom machine vision systems with smart and programmable cameras and sensors, barcode verification, and industrial PCs. We focus on guidance, identification, gauging, and inspection throughout the industrial production and packaging process.

We are seeking to expand our team of highly skilled automation engineers by filling two positions for software engineers. One position is located at the Thessaloniki office in Filyro; the other position is located at the Athens office in Kolonos, Athens.

In addition to the specified requirements and skills, this job requires the ability to work in a team, communicate clearly and professionally with colleagues and customers, travel to installation sites, support installations on site as well as remotely, and work under the pressures of strict project deadlines.

Compensation is commensurate with experience and qualifications.
